Data element concept attributes

Identifying and definitional attributes

Data element concept:	Elective care waiting list episode—elective care type
METEOR identifier:	269432
Registration status:	Health , Standard 01/03/2005
Definition:	The type of elective hospital care that a patient requires.
Context:	Admitted patients: Hospitals maintain waiting lists which may include patients awaiting hospital care other than elective surgery - for example, dental surgery and oncology treatments. This metadata item is necessary to distinguish patients awaiting elective surgery from those awaiting other types of elective hospital care. The waiting period for patients awaiting transplant or obstetric procedures is largely independent of system resource factors.
Object class:	Elective care waiting list episode
Property:	Elective care type

Guide for use:

Elective surgery comprises elective care where the procedures required by patients are listed in the surgical operations section of the Medicare Benefits Schedule, with the exclusion of specific procedures frequently done by non-surgical clinicians.

CODE 1 Elective surgery

All [elective surgery](#), that is excluding procedures listed in the exclusion list for Code 2 below, should be included in this code.

CODE 2 Other

Patients awaiting the following procedures should be classified as Code 2 - Other:

- biopsy of:
 - kidney (needle only)
 - lung (needle only)
 - liver and gall bladder (needle only)
- bronchoscopy (including fibre-optic bronchoscopy)
- cosmetic surgery not attracting a Medicare rebate
- dental procedures not attracting a Medicare rebate
- endoscopy of:
 - biliary tract and pancreas
 - oesophagus
 - large intestine, rectum and anus
- endovascular interventional procedures
- in vitro fertilisation
- miscellaneous cardiac procedures
- miscellaneous lower urinary tract procedures
- obstetrics
- organ or tissue transplant
- panendoscopy (except when involving the bladder)
- peritoneal and renal dialysis
- procedures associated with obstetrics (e.g. elective caesarean section, cervical suture)
- other diagnostic and non-surgical procedures.

These procedure terms are also defined by the Australian Classification of Health Interventions (ACHI) codes which are listed in the Comments field below. This coded list is the recommended, but optional, method for determining whether a patient is classified as requiring elective surgery or other care.

Comments:

The table of Australian Classification of Health Interventions (ACHI) procedure codes was originally prepared by the National Centre for Classification in Health. Some codes were excluded from the list on the basis that they are usually performed by non-surgeon clinicians. A more extensive and detailed listing of procedure descriptors is under development. This will replace the list in the Guide for use to more readily facilitate the identification of the exclusions when the list of codes is not used.

ACHI codes for the excluded procedures:

Biopsy (needle) of:

- kidney: 36561-00 [1047]
- lung: 38418-08 [550]
