Implementation in Data Set Specifications:

[Service provider organisation cluster \(Mainstream community housing\) Housing assistance](#), Standard 30/08/2017

DSS specific information:

The Community Housing collection collects support service type information using a series of "yes/no" questions representing different support service types. The support service types match those listed in the data element [Service provider organisation—support service type, code N\[N\]](#) ("Support service type").

The Support service type data element should be collected once for each support service type identified with a "yes" response, to a maximum of eight. If the value recorded for this data element is "88" ("Other") then a value for the data element [Service provider organisation—support service type, text \[X\(40\)\]](#) should be recorded.

Metadata items in this Data Set Specification

| Seq No. | Metadata item | Obligation | Max occurs |
|----------------|---|-------------------|-------------------|
| 1 | Service provider organisation—assistance/support other than housing assistance indicator, yes/no code N | Mandatory | 1 |
| 2 | Service provider organisation—support service type, code N[N] | Conditional | 8 |
| 3 | Service provider organisation—support service type, text [X(40)] | Conditional | 1 |
