Household file cluster (Indigenous community housing)

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 605356

Registration status: Housing assistance, Standard 30/08/2017

DSS type: Data Element Cluster

Scope: The Household file cluster collects **household** demographic information and relevant information to link the household to a dwelling and service provider organisation. The household file information is recorded for all occupants of the dwelling.

Indigenous community housing (ICH) collection households, include those living in dwellings:

- targeted to Indigenous people;
- managed by Indigenous Community Housing Organisations (ICHO) able to provide medium to long term housing tenure to tenants; and
- who received funding both in the current and/or previous financial years.

This collection excludes households living in dwellings managed under:

- mainstream community housing (i.e. not managed by an ICHO);
- public rental housing;
- state owned and managed Indigenous housing (SOMIH); and
- the Crisis Accommodation Program (CAP).

Dwellings no longer under the administration of an ICHO at 30 June reference financial year (including dwellings demolished, sold or otherwise disposed of) and dwellings not yet available to the ICHO at 30 June of the reference financial year (such as those under construction or being purchased) are also excluded.
