# Dwelling—number of days vacant, total N[NNN]

## Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Vacant days
METEOR identifier:	608070
Registration status:	<a href="#">Housing assistance</a> , Standard 30/08/2017
Definition:	The total number of days a dwelling is untenanted.
Data Element Concept:	<a href="#">Dwelling—number of days vacant</a>
Value Domain:	<a href="#">Total days N[NNN]</a>

## Value domain attributes

## Representational attributes

Representation class:	Total
Data type:	Number
Format:	N[NNN]
Maximum character length:	4
Unit of measure:	Day

## Data element attributes

## Collection and usage attributes

Guide for use:	In housing assistance a vacancy episode occurs when a dwelling is untenanted, but is available to be tenanted. The number of days in each vacancy episode is calculated by subtracting the date the dwelling was last occupied from the date the dwelling was first vacated. The vacancy start date is generally the day after the previous <a href="#">household</a> has ended their tenancy, i.e. equal to <i>Dwelling—vacancy start date</i> , DDMMYYYY on the Household (housing assistance) cluster. The vacancy end date is the day that the next household starts their tenancy in the dwelling, i.e. equal to <i>Dwelling—vacancy end date</i> , DDMMYYYY of the previous household.
