## Income unit

## Identifying and definitional attributes

Metadata item type: **Object Class** Income unit Synonymous names: **METEOR** identifier: 608087

**Registration status:** Housing assistance, Standard 30/08/2017

**Definition:** One person or a group of related persons within a **household**, whose command

over income is shared, or any person living in a non private dwelling who is in

receipt of personal income.

Context: Income units are restricted to relationships of marriage (registered or de facto) and

of parent/dependant who usually reside in the same household. This means that

an income unit can be defined as:

a married couple or sole parent, and dependent children only

• a married couple only with no dependent children present

• a person who is not related to any other household member either by

marriage or by the parent/dependant relationship.

This is the standard statistical unit for analyses of economic wellbeing, and can be an important measure in assessing the needs and circumstances of individuals and

families.
