Definition:	A person or group of persons who provide services and/or care.
Specialisation of:	Service/care provider

Source and reference attributes

Submitting organisation:	Australia Institute of Health and Welfare
---------------------------------	---

Property attributes

Identifying and definitional attributes

Property:	Geographic remoteness
Definition:	The remoteness of a location, based on the physical road distance to the nearest urban centre and its population size.
Context:	Geographic remoteness is essentially a measure of a physical location's level of access to goods and services. Large population centres tend to have a greater range of goods and services available than small centres. Typically, a population centre is not likely to provide a full range of goods and services until its population reaches around 250,000 people.
Property group:	Location characteristics
