National Indigenous Reform Agreement: PI 15b—Proportion of Indigenous 20–64 year olds with or working towards a post-school qualification in Certificate level III or above (survey data), 2016

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	PI 15b—Proportion of Indigenous 20–64 year olds with or working towards a post-school qualification in Certificate level III or above (survey data), 2016
METEOR identifier:	611212
Registration status:	Indigenous, Superseded 01/07/2016
Description:	Proportion of people aged 20–64 years with or working towards post-school qualifications in Australian Qualifications Framework (AQF) Certificate level III or above by Indigenous status.
Rationale:	Post-secondary education leads to better employment prospects and, for Indigenous people, will help to achieve the target to halve the gap in employment outcomes within a decade.
Indicator set:	National Indigenous Reform Agreement (2016) Indigenous, Superseded 01/07/2016
Outcome area:	The Indigenous workforce age population has the depth and breadth of skills and capabilities required for the 21st century labour market Indigenous, Standard 21/07/2010

Collection and usage attributes

Population group age from:	20 years
Population group age to:	64 years
Computation description:	Presentation: Number and percentage (per 100 persons). 95% confidence intervals and relative standard errors are calculated for proportions.
Computation:	100 x (Numerator ÷ Denominator).
Numerator:	People aged 20–64 years who have attained a post-school qualification at the AQF Certificate level III or above, or are currently studying a non-school qualification at any level.
Numerator data elements:	**Data Element / Data Set** **Data Element** Level of current study **Data Source** ABS Survey of Education and Work (SEW) **Guide for use** Data source type: Survey Based on 2012 SEW. Supplementary non-Indigenous numerator data source in between Census

Data source type: Survey

Comments: There are no updated data available for this cycle of reporting.

The most recent available data are:

- AATSIHS (Indigenous); core content: NATSIHS component of the AATSIHS and NATSINPAS component of the AATSIHS; and
- SEW (non-Indigenous).

The baseline report presented data from the 2008 NATSISS (Indigenous) and 2008 SEW (non-Indigenous) as the supplementary data collection.

For people 'with' a non-school qualification:

- People whose level of non-school qualification is determined to be certificate level but is not able to be further defined (that is, Certificate nfd) are assumed to have attained a qualification below Certificate level III and are therefore excluded from the numerator for this indicator.
- People whose level of non-school qualification cannot be determined are assumed to have attained a qualification below Certificate level III and are therefore excluded from the numerator for this indicator.

For people 'working towards' a non-school qualification:

- Level of qualification is available from the AATSIHS and SEW for people 'working towards' a post-school qualification but is not reported to maintain consistency with the main data source (Census) for which this disaggregation is not available. Therefore, people working towards any non-school qualification are included in the calculations for this data source for this indicator.

Prior to 2010, the SEW did not include people living in very remote areas. From 2010 onwards, the SEW includes people living in very remote areas excluding discrete Indigenous communities.

Prior to 2010, the SEW did not include the remoteness variable. Therefore, a non-Indigenous comparator for remoteness for the 2008 NATSISS is not reported.

The size of the standard errors mean that SEW data may not be adequate for measuring change over time.

Baseline year for NIRA target (Halve the gap in employment outcomes between Indigenous and non-Indigenous Australians within a decade) is 2008; baseline year for this measure is 2008; target year is 2018.

Representational attributes
