| Numerator:                 | Total number o<br>over in 2012-13   | f hip fracture admissions to hospital for people aged 65 years and<br>3. |  |
| Numerator data elements:   | Data Eleme  | nt / Data Set  |  |
|                            | Person-age  | e, total years N[NN]   |  |
|                            | NMDS / DSS  |  |  |
|                            | Admitted pat  | tient care NMDS 2012-13  |  |
|                            | Guide for use   |  |  |

People aged 65 years and over in 2012-13 who were admitted to hospital with a principal or additional diagnosis of hip fracture were included in the analysis of this item.

Excludes epsiodes where the patient transferred to another facility within 2 days.

### -Data Element / Data Set-

Episode of care—additional diagnosis, code (ICD-10-AM 7th edn) ANN{.N[N]}

### NMDS / DSS

Admitted patient care NMDS 2012-13

### Guide for use

Patients with any of the following principal or additional diagnosis codes were included:

| ICD-10-AM (7th edn)<br>code | Description  |
|-----------------------------|--|
| S72.00                      | Fracture of neck of femur, part unspecified            |
| S72.01                      | Fracture of intracapsular section of femur             |
| S72.02                      | Fracture of upper epiphysis (separation) of femur      |
| S72.03                      | Fracture of subcapital section of femur                |
| S72.04                      | Fracture of midcervical section of femur               |
| S72.05                      | Fracture of base of neck of femur                      |
| S72.08                      | Fracture of other parts of neck of femur               |
| S72.10                      | Fracture of trochanteric section of femur, unspecified |
| S72.11                      | Fracture of intertrochanteric section of femur         |
| S72.2                       | Subtrochanteric fracture                               |

### Data Element / Data Set

Episode of care—principal diagnosis, code (ICD-10-AM 7th edn) ANN{.N[N]}

### NMDS / DSS

Admitted patient care NMDS 2012-13

Guide for use

| Disaggregation:               | Statistical Area Level<br>(person)  | 4, which have been derived from Postcode—Australian   |  |
|                               | markets within e<br>the Labour Forc<br>economic break<br>• SA4s are built fr<br>state/territories | ned for the output of labour force data and reflect labour<br>each state and territory within the population limits imposed by<br>e Survey sample. SA4s provide the best sub-state socio-<br>down in the ASGS.<br>from whole SA3s. Whole SA4s aggregate directly to<br>in the ASGS Main Structure and greater capital city SAs. |  |

SA4s do not cross state/territory borders. There are 88 SA4 spatial units. In aggregate, they cover the whole of Australia without gaps or overlaps.

# Disaggregation data elements:

### - Data Element / Data Set

Address—Australian postcode, Australian postcode code (Postcode datafile) {NNNN}

### NMDS / DSS

<u>COMPLETE - Pharmaceutical Benefits Scheme (PBS) Pharmacy claim script</u> <u>detail</u>

### Guide for use

Postcode is based on that which is provided by the patient to the hospital at which they are admitted.

Data source type: Administrative by-product data

Used for disaggregation by Statistical Area Level 4.

### -Data Element / Data Set-

Address-statistical area, level 4 (SA4) code (ASGS 2011) NNN
