

# Acute coronary syndromes: 6e-Discharge summary provided to general practitioner or ongoing clinical provider within 48 hours of separation from hospital

## Identifying and definitional attributes

<b>Metadata item type:</b>	Indicator
<b>Indicator type:</b>	Indicator
<b>Short name:</b>	Indicator 6e-Discharge summary provided to general practitioner or ongoing clinical provider within 48 hours of separation from hospital
<b>METEOR identifier:</b>	612091
<b>Registration status:</b>	<ul style="list-style-type: none"><li>• <a href="#">Health</a>, Standard 12/09/2016</li></ul>
<b>Description:</b>	Proportion of patients with a final diagnosis of <a href="#">acute coronary syndrome (ACS)</a> whose discharge summary is provided to their general practitioner (GP) or ongoing clinical provider within 48 hours of separation from hospital.
<b>Rationale:</b>	The provision of a discharge summary to a GP or ongoing clinical provider demonstrates appropriate clinical handover (ACSQHC 2013).
<b>Indicator set:</b>	<a href="#">Clinical care standard indicators: acute coronary syndromes</a> <a href="#">Health</a> , Standard 12/09/2016
<b>Outcome area:</b>	<a href="#">Individualised care plan</a> <a href="#">Health</a> , Standard 12/09/2016

## Collection and usage attributes

<b>Computation description:</b>	Both the numerator and the denominator include patients with acute chest pain, or other symptoms suggestive of ACS.  Presented as a percentage.
<b>Computation:</b>	$(\text{Numerator} \div \text{denominator}) \times 100$
<b>Numerator:</b>	Number of patients with a final diagnosis of ACS whose discharge summary has been provided to their GP or relevant health service provider within 48 hours of separation from hospital.
<b>Denominator:</b>	Number of patients with a final diagnosis of ACS separated from hospital.

## Representational attributes

<b>Representation class:</b>	Percentage
<b>Data type:</b>	Real
<b>Unit of measure:</b>	Episode
<b>Format:</b>	N[NN]
