

Activity based funding: Emergency service care NBEDS 2016-17

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 612344

Registration status:

- [Health](#), Superseded 05/10/2016

DSS type: Data Set Specification (DSS)

Scope: The scope of this data set is emergency services provided in [activity based funded](#) hospitals which do not meet all of the following criteria:

- Purposely designated and equipped area with designated assessment; treatment and resuscitation areas.
- Ability to provide resuscitation, stabilisation and initial management of all emergencies.
- Availability of medical staff available in the hospital 24 hours a day.
- Designated emergency department nursing staff 24 hours a day, 7 days a week, and a designated emergency department nursing unit manager.

The care provided to patients in emergency services/urgent care centres is, in most instances, recognised as being provided to non-admitted patients. Patients being treated in emergency services/urgent care centres may subsequently become admitted. All patients remain in-scope for this collection until they are recorded as having physically departed the emergency service/urgent care centre, regardless of whether they have been admitted. For this reason there is an overlap in the scope of this data set and the Admitted patient care National Minimum Data Set (APC NMDS).

The scope also includes services where patients did not wait to be attended by a health care professional and those dead on arrival. Patients with Department of Veterans' Affairs or compensable funding source are also included in the scope of the collection.

Excluded from the scope are:

- Care provided to patients in General Practitioner (GP) co-located units. However, patient presentations that result in a referral to a GP co-located unit after registration, but before commencement of clinical care, are in scope.

Collection and usage attributes

Statistical unit: [Emergency department stay](#)

Collection methods: **National reporting arrangements**

State and territory health authorities provide the data to the Independent Hospital Pricing Authority (IHPA) for national collection, on a six monthly basis as required under national health reform arrangements.

Periods for which data are collected and nationally collated

Financial years ending 30 June each year.

Six-monthly data collection commencing 1 July each year.

Implementation start date: 01/07/2016

Implementation end date: 30/06/2017

Comments: *Scope links with other metadata sets*

Episodes of care for admitted patients are reported through the Admitted patient care NMDS.

Mental health care provided in emergency services is in scope for the Activity based funding: Emergency service care National Best Endeavours Data Set.
