## Person—family name

## Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 613333

**Registration status:** Aged Care, Standard 30/06/2023

Health, Standard 05/10/2016
Indigenous, Standard 07/04/2024
Tasmanian Health, Standard 27/06/2017

**Definition:** The name a person has in common with some other members of their family. It is

often hereditary, and is distinguished from that person's first given name.

**Context:** Administrative purposes and individual identification.

## Object Class attributes

#### Identifying and definitional attributes

Object class: Person

**Definition:** A human being.

## Collection and usage attributes

**Comments:** Prior to 13 March 2018, the definition of the 'Person' Object class was 'A human

being, whether man, woman or child'. From 13 March 2018, the definition was edited by removing the words '...whether man, woman or child' so that a person is defined as 'A human being'. This amendment was undertaken to align the definition of a person with the *Australian Government Guidelines on the Recognition of Sex and Gender* and the Australian Bureau of Statistics (ABS) *Standard for Sex and Gender Variables*, which recognise that there are sex and gender types that are

not exclusively male or female.
