# Available bed—admitted contracted care, average number of beds N[N(7).N]

# Identifying and definitional attributes

Metadata item type: Data Element

**Short name:** Average available beds for admitted contracted care

METEOR identifier: 616011

Registration status: Health, Standard 04/08/2016

**Definition:** The number of beds available to care for admitted patients that an establishment

provides via contractual arrangements with private hospitals.

Data Element Concept: Available bed—admitted contracted care

Value Domain: Average number of beds N[N(7).N]

#### Value domain attributes

# Representational attributes

Representation class: Average

Data type: Number

Format: N[N(7).N]

Maximum character length: 9
Unit of measure: Bed

# Collection and usage attributes

**Guide for use:** Average available beds, rounded to the nearest decimal or whole number.

## Data element attributes

# Collection and usage attributes

**Guide for use:** Where available, actual data should be reported.

Where actual data are not available, this measure can be calculated by dividing the total contracted patient days by the number of days in the period, e.g. in a normal year, a hospital records 4000 contracted care patient days – the average available

contracted care beds would be 4000/365 = 11.0.

**Collection methods:** Beds exclusively or predominantly for overnight-stay admitted care and same-day

admitted care are collected and reported.

Comments: This data element is necessary to provide an indicator of the availability of admitted

patient care provided under contracted care arrangements by an establishment.
