ACT-prioritised Australian state/territory code AA[A]

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	616563
Registration status:	Commonwealth Department of Health , Retired 19/10/2023
Definition:	A code set representing Australian states and territories, with the ACT prioritised to the top of the set of permissible values.

Representational attributes

Representation class:	Code	
Data type:	String	
Format:	AA[A]	
Maximum character length:	3	
Permissible values:	Value	Meaning
	ACT	Australian Capital Territory
	NSW	New South Wales
	VIC	Victoria
	QLD	Queensland
	SA	South Australia
	WA	Western Australia
	TAS	Tasmania
	NT	Northern Territory
Supplementary values:	UNK	Unknown

Collection and usage attributes

Guide for use:	Care should be taken when using this value domain as it presents the Australian states/territories in an order different to those most commonly used by agencies such as the Australian Bureau of Statistics (ABS) and the Australian Institute of Health and Welfare (AIHW). The state/territory order presented in this value domain is known to be used in the underlying information systems of the Medicare Benefits Scheme (MBS) and the Pharmaceutical Benefits Scheme (PBS), and possibly reflects the historical data management practices of some Canberra-based Commonwealth government agencies, whereby Canberra (and by extension, the ACT) was considered to represent something like 'Central office' or 'Head office'. Agencies such as the ABS and AIHW publish data in state/territory order based on population. The ABS-preferred order (NSW, Vic., Qld, SA, WA, Tas., NT and ACT) reflects historic relative state/territory populations and has been retained by the ABS to preserve continuity of presentation and minimise the risk of error in the handling or interpreting of data. The AIHW-preferred order reflects more recent trends in the relative populations of the states/territories, i.e. as above, but with WA before SA and ACT before NT.
