Rehabilitation unit indicator

Identifying and definitional attributes

Metadata item type: Property

METEOR identifier: 620006

Registration status: [Health](#), Standard 03/11/2016

Definition: An indicator of whether a unit provides rehabilitation care in which the primary clinical purpose or treatment goal is improvement in the functioning of a patient with an impairment, activity limitation or participation restriction due to a health condition.

Rehabilitation care is always delivered under the management of or informed by a clinician with specialised expertise in rehabilitation, and evidenced by an individualised multidisciplinary management plan.
