Value domain attributes

Identifying and definitional attributes

Value domain:	Vaccine type code N
METEOR identifier:	624102
Registration status:	<ul style="list-style-type: none">Health, Standard 28/04/2016
Definition:	A code set representing the type of vaccine.

Representational attributes

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

Permissible values:

Value	Meaning
1	Hepatitis B
2	Human papillomavirus (HPV)
3	Meningococcal disease
4	Hepatitis A
5	Influenza
6	Measles, mumps and rubella

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: This data element is used in conjunction with the data element: [Prison—number of vaccine doses administered, number N\[NN\]](#) to gain information about the immunisation programs available in Australia's prisons.

Comments: Immunisation is highly effective in reducing morbidity and mortality caused by vaccine-preventable diseases.

The Prisoner Health Information Group agreed that it was of most interest to collect information regarding hepatitis B, human papillomavirus and meningococcal vaccinations.
