

Prisoner health discharge summary cluster

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	624391
Registration status:	<ul style="list-style-type: none">Health, Standard 28/04/2016
DSS type:	Data Element Cluster
Scope:	The Prisoner health discharge summary cluster defines the number of sentenced and remand prisoners that were released from a prison during the National Prisoner Health Data Collection period and who have a health-related discharge summary on file at the time of their release.

Collection and usage attributes

Guide for use:	The Prisoner health discharge summary cluster combines three data elements to define the number and type of prisoners who have a discharge summary on file when they are released from prison. The data elements include: Person—prisoner health discharge summary indicator, yes/no code N , Person—legal status of prisoner, code N and Prison—number of prisoners released, number N[NN] . The cluster provides the following information:
-----------------------	---

Detention status	Discharge summary indicator	Number
Remand(a)	Yes	N[NN]
Remand	No	N{NN}
Sentenced(b)	Yes	N[NN]
Sentenced	No	N[NN]

(a) Remand prisoners are persons who have been placed in custody while awaiting the outcome of a court hearing.

(b) Sentenced prisoners are those persons who have received a term of imprisonment from a court. This includes offenders who have been given an indeterminate sentence or custodial order, for example, forensic patients, or those who have received a life sentence.

Note: The number of prisoners who were released from a prison during the National Prisoner Health Data Collection period does not include transfers to other prisons.

Comments:	The Prisoner health discharge summary cluster is included in the Prisoner Health NBEDS as the National Prisoner Health Indicators include the indicator: Proportion of prisoners who had a health-related discharge summary in place at time of their release.
