Person—current opioid pharmacotherapy treatment program indicator, prisoner health yes/no/unknown code N

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Current opioid pharmacotherapy treatment program indicator

Synonymous names: Current opiate replacement program indicator

METEOR identifier: 626588

Registration status: <u>Health,</u> Standard 28/04/2016

Definition: An indicator of a person's current participation in a drug-based opioid dependence

treatment program, as represented by a code.

Data Element Concept: Person—current opioid pharmacotherapy treatment program indicator

Value Domain: Prisoner health yes/no/unknown code N

Value domain attributes

Representational attributes

Representation class: Code

Data type: Number

Format:

Maximum character length: 1

Value Meaning

Permissible values: 1 Yes

2 No

Supplementary values: 9 Unknown

Collection and usage attributes

Guide for use: For use in Prisoner health data collections. If this value domain is used with other

metadata then 'Unknown' would map to code 8.

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: This data element should be used in conjunction with the data element: Person—

type of opioid pharmacotherapy treatment, code N to provide information on a

person's current opioid pharmacotherapy treatment.

Comments: Imprisonment may provide an opportunity to access drug treatments including

pharmacotherapy and counselling programs.

Examples of opioid substitution programs include methadone, naltrexone,

buprenorphine, suboxone and LAAM.

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Reference documents: Kastelic A, Pont J & Stover H 2008. Opioid substitution treatment in custodial

settings: a practical guide. Oldenburg: BIS-Verlag.
