National Healthcare Agreement: PI 01—Proportion of babies born of low birth weight, 2017

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Progress measure
Short name:	PI 01—Proportion of babies born of low birth weight, 2017
METEOR identifier:	629984
Registration status:	Health , Superseded 30/01/2018
Description:	The incidence of low birthweight among live born singleton babies.
Indicator set:	National Healthcare Agreement (2017) Health , Superseded 30/01/2018
Outcome area:	Prevention Health , Standard 07/07/2010
Data quality statement:	National Healthcare Agreement: PI 01-Proportion of babies born with low birth weight, 2017, QS Health , Standard 31/01/2017

Collection and usage attributes

Computation description:	<p>Low birthweight is defined as less than 2,500 grams.</p> <p>Excludes multiple births, stillbirths and births of less than 20 weeks gestation.</p> <p>Analysis by state/territory, remoteness and Socio-Economic Indexes for Areas (SEIFA) Index of Relative Socio-economic Disadvantage (IRSD) is based on usual residence of the mother.</p> <p>Data excludes Australian non-residents, residents of external territories and records where state/territory of residence was not stated.</p> <p>Variability bands are to be calculated for single-year and aggregate years data by state and territory using the method below.</p> <p>Presented as a:</p> <ul style="list-style-type: none">percentage, andnumber (for disaggregations by Indigenous status).
---------------------------------	--

Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$ <p>Variability bands: to be calculated using the standard method for estimating 95% confidence intervals as follows:</p> $CI (CR)_{95\%} = CR \pm 100 \times 1.96 \times \sqrt{[(CR/100) \times (1 - (CR/100))]/n}$ <p>Where n=number of live born singleton infants.</p> <p>CI = confidence interval</p> <p>CR = crude rate (expressed as a percentage)</p>
Numerator:	Number of low birthweight live born singleton infants.

Disaggregation:

2014—Nationally, by:

- remoteness (Australian Statistical Geography Standard (ASGS) Remoteness Structure)
- 2011 Socio-Economic Indexes for Areas (SEIFA) Index of Relative Socio-economic Disadvantage (IRSD) deciles

2014—State and territory, by:

- Indigenous status of the mother
- Indigenous status of baby (not reported)

2012-14—State and territory, by:

- Indigenous status of the mother

Disaggregation by Indigenous status of the mother and the baby are recommended to be reported using three-year combined data for the current reporting period due to the small number of low birth weight infants born to Indigenous mothers each year, and the small number of low birth weight Indigenous infants born each year. Single year data (2014) will be reported for time-series (state/territory by Indigenous status).

Note that data collection methods for Indigenous status of the mother and baby may vary between states and territories. Disaggregation by Indigenous status of baby will only be available if the National Indigenous Reform Agreement Performance Information Management Group determine that the data are of sufficient quality.

Disaggregation data elements:**Data Element / Data Set**[Person—Indigenous status, code N](#)**Data Source**[AIHW National Perinatal Data Collection \(NPDC\)](#)**NMDS / DSS**[Perinatal NMDS 2014-18](#)**Guide for use**

Data source type: Administrative by-product data

Data Element / Data Set[Person—area of usual residence, statistical area level 2 \(SA2\) code \(ASGS 2011\) N\(9\)](#)**Data Source**[AIHW National Perinatal Data Collection \(NPDC\)](#)**NMDS / DSS**[Perinatal NMDS 2014-18](#)**Guide for use**

Data source type: Administrative by-product data

Used for disaggregation by state/territory, remoteness and SEIFA IRSD.

Geographic unit used is Statistical Area Level 2 (SA2). If data are coded according to the Australian Standard Geographical Classification (ASGC) boundaries, concordance files are used to map to the ASGS.

Comments: Most recent data available for 2017 National Healthcare Agreement performance reporting: 2014 (calendar year data).

Indigenous: Aggregated data (2012 to 2014) will be reported for the current reporting period (state and territory).

Single year data (2014) will be reported for time-series (state and territory).

Information is included in the National Perinatal Data Collection (NPDC) for all live births and still births of at least 400 grams birthweight or at least 20 weeks gestation. Data for this indicator may therefore include live born terminations of pregnancy of at least 20 weeks gestation.

For 2014 data, the 2011 SEIFA IRSD quintile and decile data will be produced using the ASGS geographical unit of Statistical Area Level 2.

Representational attributes

Representation class: Percentage

Data type: Real

Unit of measure: Person

Format: N[NN.NN]

Indicator conceptual framework

Framework and dimensions: [Community and socioeconomic](#)

Data source attributes
