**Comments:**

Most recent data available for 2017 National Healthcare Agreement performance reporting: 2014–15 (total population, non-Indigenous: NHS); 2014–15 (Indigenous only: NATSISS).

National Aboriginal and Torres Strait Islander Social Survey (NATSISS) or National Aboriginal and Torres Strait Islander Health Survey (NATSIHS) data may be used for analysis, dependent upon which survey is most recent.

Data on persons 'at risk of long term alcohol related harm' had previously been defined according to the 2001 NHMRC guidelines: for males, an average of more than 4 standard drinks per day in the last week, and for females, an average of more than 2 standard drinks per day in the last week.
