National Healthcare Agreement: PI 28—Proportion of residential aged care services that are three year re-accredited, 2017

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Progress measure
Short name:	PI 28—Proportion of residential aged care services that are three year re-accredited, 2017
METEOR identifier:	630059
Registration status:	Health , Superseded 30/01/2018
Description:	The proportion of residential aged care services that are three or more year re-accredited.
Indicator set:	National Healthcare Agreement (2017) Health , Superseded 30/01/2018
Outcome area:	Aged Care Health , Standard 07/07/2010
Data quality statement:	National Healthcare Agreement: PI 28-Proportion of residential aged care services that are three year re-accredited, 2017 QS Health , Standard 31/01/2017

Collection and usage attributes

Computation description:	The proportion of re-accreditations for three or more years for residential aged care services over the financial year in question. Includes decisions made during the financial year following a re-accreditation site audit or a review audit activity. The decisions are as in effect at 30 June. These data may not align exactly with the number of re-accreditation reviews undertaken during the financial year as decisions may not have come into effect or may have been superseded.
Computation:	$100 \times (\text{Numerator} \div \text{Denominator})$
Numerator:	Number of residential aged care facilities that received re-accreditation for three or more years during the financial year, decision as in effect at 30 June.

Numerator data elements:**Data Element / Data Set**

Residential aged care facility—date of re-accreditation decision

Data source type: Administrative by-product data

Disaggregation:

2015–16—State and territory by:

- remoteness (Australian Statistical Geography Standard (ASGS) Remoteness Structure).
- size of residential aged care facility (places).

Some disaggregations may result in numbers too small for publication.

Disaggregation data elements:

Data Element / Data Set

Residential aged care facility—geographical location

Data source type: Administrative by-product data

Comments:

Most recent data available for the 2017 National Healthcare Agreement performance reporting: 2015–16.

Commencing services receive accreditation for one year in the first instance, and are excluded from consideration until their first re-accreditation occurs.

Re-accreditation is provided for a period up to three years for most residential aged care homes. A pilot program commenced in 2014–15 whereby residential aged care homes in the pilot program are eligible for five years re-accreditation. These homes are included in this indicator with homes that achieved three year re-accreditation. Three or more year re-accreditation indicates that the facility:

- meets all or almost all 44 expected outcomes and/or does not have any failure to meet the standards that compromises the health, safety or wellbeing of the residents;
- has satisfied the Australian Aged Care Quality Agency (AACQA) that it will rectify any identified failure to meet the Accreditation Standards in a short timeframe;
- is not in breach of any other significant obligations under the *Aged Care Act 1997* notified to the AACQA by the Department of Social Services; and
- has satisfied the AACQA that it undertakes continuous improvement.

Summary national and state/territory data appear in the annual report of the AACQA are also published in the annual Report on Government Services.

Representational attributes

Representation class: Percentage

Data type: Real

Unit of measure: Person

Format: N[NN].N

Data source attributes
