National Healthcare Agreement: PI 33–Full time equivalent employed health practitioners per 1,000 population (by age group), 2017

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Progress measure
Short name:	PI 33–Full time equivalent health workforce, 2017
METEOR identifier:	630069
Registration status:	Health , Superseded 30/01/2018
Description:	Full-time equivalent (FTE) employed health practitioners per 100,000 population (for the professions of medical practitioners, nurses/midwives, dental practitioners and allied health practitioners).
Indicator set:	National Healthcare Agreement (2017) Health , Superseded 30/01/2018
Outcome area:	Sustainability Health , Standard 07/07/2010
Data quality statement:	National Healthcare Agreement: PI 33-Full time equivalent employed health practitioners per 1,000 population (by age group), 2017 QS Health , Standard 31/01/2017

Collection and usage attributes

Computation description:	<p>For this indicator, the workforce for each profession is defined as those employed in the profession. This excludes those who are registered in the profession but are retired from regular work, working outside the profession, working in the profession but on extended leave of 3 months or more or working outside Australia.</p> <p>FTE number = Total hours worked by workforce ÷ Standard working week for selected professions.</p> <p>For the purpose of this indicator, a full-time working week has been defined as 40 hours for medical practitioners and as 38 hours for dental practitioners, nurses and midwives, and allied health practitioners.</p> <p>Allied health practitioners comprise Aboriginal and Torres Strait Islander health practitioners, Chinese medical practitioners, chiropractors, medical radiation practitioners, occupational therapists, optometrists, osteopaths, pharmacists, physiotherapists, podiatrists and psychologists.</p>
Computation:	$100,000 \times (\text{Numerator} \div \text{Denominator})$
Numerator:	FTE number in the workforce in the reference year

Principal place of practice—Australian state/territory identifier

Comments:

Most recent data available for the 2017 National Healthcare Agreement performance reporting: 2015.

The 2015 workforce data was sourced by the Australian Institute of Health and Welfare (AIHW) from the Australian Health Practitioner Regulation Agency and the Australian Government Department of Health.

FTE employed health practitioner rates calculated from the National Health Workforce Data Set are available on a national basis from 2011.

For medical practitioners, nurses and midwives, dental practitioners and allied health practitioners, 10-year age groups will be needed to support the disaggregation by state and territory. Age groups are: under 25, 25–34, 35–44, 45–54, 55–64 and 65 or over.

Status of the calculation of full-time equivalent employed health practitioner rate for professions is:

1. Medical practitioner workforce: Data for 2015 are available.
2. Nursing and midwifery workforce: Data for 2015 are available.
3. Dental workforce: Data for 2015 are available.
4. Allied health workforce: Data for 2015 are available. The allied health workforce comprises the professions of Aboriginal and Torres Strait Islander health practitioners, Chinese medical practitioners, chiropractors, medical radiation practitioners, occupational therapists, optometrists, osteopaths, pharmacists, physiotherapists, podiatrists and psychologists.

Representational attributes

Representation class: Rate
Data type: Real
Unit of measure: Person
