Collection and usage attributes

Guide for use: The Australian Bureau of Statistics (ABS) *Standard for Sex and Gender Variables* includes the following Alternate Code system:

M Male

F Female

X Other

For statistical purposes, the following category codes, labels and definitions are preferred:

CODE 1 Male

Persons who have male or predominantly masculine biological characteristics, or male sex assigned at birth.

CODE 2 Female

Persons who have female or predominantly feminine biological characteristics, or female sex assigned at birth.

CODE 3 Other

Persons who have mixed or non-binary biological characteristics (if known), or a non-binary sex assigned at birth.

The value meaning of 'Other' has been assigned to Code 3 for this value domain, which replaces 'Intersex or indeterminate' for the superseded value domain [Sex code N](#). Terms such as 'indeterminate', 'intersex', 'non-binary', and 'unspecified' are variously used to describe the 'Other' category of sex. The label 'Other' is used because a more descriptive term has not been widely agreed within the general community.

Sex refers to the chromosomal, gonadal and anatomical characteristics associated with biological sex. Where there is an inconsistency between anatomical and chromosomal characteristics, sex is based on anatomical characteristics.

Comments: The ABS will periodically review its *Standard for Sex and Gender Variables*. This process will specifically investigate the appropriateness of the naming of the 'Other' category.
