Data type:	String
Format:	X[X(99)]
Maximum character length:	100

Data element attributes

Collection and usage attributes

Guide for use:	<p>This data element may be used where 'Other' has been selected in the data element: Person—sex, code X</p> <p>This data element may be used to capture any further (optional) specification of sex descriptors. The inclusion of this write-in facility where the 'Other' code has been selected for Person—sex, code X allows respondents the opportunity to describe their sex using a term they are comfortable with, whilst also maximising the potential for analysis of the responses provided. For example, respondents could report terms such as 'indeterminate', 'intersex', 'non-binary', and 'unspecified' for sex.</p> <p>Data element sets implementing this data element should include a Conditional obligation with the following text: 'Conditional on 'Other' response in the data element: Person—sex, code X'.</p>
