

Survey—type of enumeration period

Metadata item type: Data Element Concept
METEOR identifier: 637130
Registration status:

- [Health](#), Standard 25/01/2018

Definition: The type of period over which a survey is administered.

Object Class attributes

Identifying and definitional attributes

Object class: [Survey](#)

Definition: The collection of information about characteristics of interest from some, or all, units of a population using well-defined concepts, methods and procedures.

Statistical surveys collect data to answer a question by placing a statistical value to an indicator or measure. Surveys measure one or more characteristics of the whole population or a sample of the population.
