Run number

Identifying and definitional attributes

Metadata item type:	Property
METEOR identifier:	637381
Registration status:	Commonwealth Department of Health , Recorded 21/10/2016
Definition:	An identifier for the output or results of a computer system, program or process that is likely to be repeated multiple times.
Context:	Typically, a run number might be used to distinguish between the outputs from different instances of the successful execution of a computer program, e.g. two separate data extracts created via the same program but run on different days may be distinguished by their run numbers.
