Survey

Identifying and definitional attributes

Metadata item type: Object Class

METEOR identifier: 637718

Registration status: [Health](#), Standard 25/01/2018

Definition: The collection of information about characteristics of interest from some, or all, units of a population using well-defined concepts, methods and procedures.

Statistical surveys collect data to answer a question by placing a statistical value to an indicator or measure. Surveys measure one or more characteristics of the whole population or a sample of the population.
