Duplicate/intertwined/similar record code N

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	638835
Registration status:	Health , Standard 05/10/2016
Definition:	A code set representing duplicate, intertwined or similar records.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Duplicate record
	2	Intertwined record
	3	Similar but different record

Collection and usage attributes

Guide for use:	CODE 1 Duplicate record This code is used where multiple records are found for a single entity. CODE 2 Intertwined record This code is used for a record that is shared by more than one entity. Intertwined records are created when two or more people or organisations are assigned the same identifier and their data are associated with the same record. CODE 3 Similar but different record This code is used for records that have similar identifying information but belong to different entities.
