Data element attributes

Collection and usage attributes

Collection methods:	Sex/gender information is collected and recorded to help verify the identity of individuals who claim, or are in receipt, of social security payments. An Australian birth certificate, current Australian passport or current foreign passport, or a statement from a registered medical practitioner or registered psychologist, are acceptable documents to verify a person's gender.

Comments: The Australian Government Department of Social Services/Centrelink forms collect information from recipients using the terms 'sex' and 'gender'. It is therefore not possible to differentiate between the two terms or use a data element that defines either sex or gender.

DSS specific information:

Sex/gender refers to the variable GENDER in the PIA research data set.

The data are collected as 'sex' but interpreted as 'gender'. Values may change over time if an individual's gender identity alters during their lifetime.
