Value domain attributes

Identifying and definitional attributes

Value domain:	Sex/gender code A
METEOR identifier:	671702
Registration status:	Commonwealth Department of Social Services (retired) , Standard 20/06/2018
Definition:	A code set representing the distinction between male, female and non-binary gender.

Representational attributes

Representation class:	Code	
Data type:	String	
Format:	A	
Maximum character length:	1	
	Value	Meaning
Permissible values:	M	Male
	F	Female
	X	Other

Collection and usage attributes

Guide for use: CODE X Other

Other refers to any person who does not exclusively identify as either male or female. Terms such as 'indeterminate', 'intersex', 'non-binary', and 'unspecified' are variously used to describe the 'Other' category of sex.

Data element attributes

Collection and usage attributes

Collection methods: Sex/gender information is collected and recorded to help verify the identity of individuals who claim, or are in receipt, of social security payments.

An Australian birth certificate, current Australian passport or current foreign passport, or a statement from a registered medical practitioner or registered psychologist, are acceptable documents to verify a person's gender.

Comments: The Australian Government Department of Social Services/Centrelink forms collect information from recipients using the terms 'sex' and 'gender'. It is therefore not possible to differentiate between the two terms or use a data element that defines either sex or gender.

Relational attributes

Implementation in Data Set Specifications: [Demographics Cluster](#)
[Commonwealth Department of Social Services \(retired\)](#), Standard 20/06/2018
DSS specific information:

Sex/gender refers to the variable GENDER in the PIA research data set.

The data are collected as 'sex' but interpreted as 'gender'. Values may change over time if an individual's gender identity alters during their lifetime.
