Collection and usage attributes

Guide for use:

CODE 8 Unknown

This code should be used for Health of the Nation Outcome Scale for elderly people (HoNOS 65+) values that are missing or recorded in the HoNOS 65+ tool as '9 - Unknown'.

The HoNOS 65+ is used to rate adult mental health service users. Together, the scales rate various aspects of mental and social health.

HoNOS 65+ is answered on an item-specific anchored 4-point scale with higher scores indicating more problems. Each scale is assigned a value of between 0 and 4, or 9 for unknown. The twelve scales are as follows:

- Behavioural disturbance
- Non-accidental self injury
- Problem drinking or drug use
- Cognitive problems
- Problems related to physical illness or disability
- Problems associated with hallucinations and delusions
- Problems associated with depressive symptoms
- Other mental and behavioural problems
- Problems with social or supportive relationships
- Problems with activities of daily living
- Overall problems with living conditions
- Problems with work and leisure activities and the quality of the daytime environment.

The sum of the individual scores of each of the scales represents the total HoNOS 65+ score. The total HoNOS 65+ score ranges from 0 to 48, and represents the overall severity of an individual's psychiatric symptoms.
