Identifier—investigation outcome, duplicate/intertwined/similar record code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Identifier investigation outcome
METEOR identifier:	642247
Registration status:	Health , Standard 05/10/2016
Definition:	The conclusion reached following an investigation into an identifier, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Identifier—investigation outcome
METEOR identifier:	642243
Registration status:	Health , Standard 05/10/2016
Definition:	The conclusion reached following an investigation into an identifier.
Object class:	Identifier
Property:	Investigation outcome

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare

Value domain attributes

Identifying and definitional attributes

Value domain:	Duplicate/intertwined/similar record code N
METEOR identifier:	638835
Registration status:	Health , Standard 05/10/2016
Definition:	A code set representing duplicate, intertwined or similar records.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Duplicate record
	2	Intertwined record
	3	Similar but different record

Collection and usage attributes

Guide for use:

CODE 1 Duplicate record

This code is used where multiple records are found for a single entity.

CODE 2 Intertwined record

This code is used for a record that is shared by more than one entity. Intertwined records are created when two or more people or organisations are assigned the same identifier and their data are associated with the same record.

CODE 3 Similar but different record

This code is used for records that have similar identifying information but belong to different entities.
