

Identifier—investigation outcome, duplicate/intertwined/similar record code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Identifier investigation outcome
METEOR identifier:	642247
Registration status:	<ul style="list-style-type: none">• Health, Standard 05/10/2016
Definition:	The conclusion reached following an investigation into an identifier, as represented by a code.
Data Element Concept:	Identifier—investigation outcome

Value domain attributes

Representational attributes

Representation class:	Code								
Data type:	Number								
Format:	N								
Maximum character length:	1								
Permissible values:	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Duplicate record</td></tr><tr><td>2</td><td>Intertwined record</td></tr><tr><td>3</td><td>Similar but different record</td></tr></tbody></table>	Value	Meaning	1	Duplicate record	2	Intertwined record	3	Similar but different record
Value	Meaning								
1	Duplicate record								
2	Intertwined record								
3	Similar but different record								

Collection and usage attributes

Guide for use:	<p>CODE 1 Duplicate record</p> <p>This code is used where multiple records are found for a single entity.</p> <p>CODE 2 Intertwined record</p> <p>This code is used for a record that is shared by more than one entity. Intertwined records are created when two or more people or organisations are assigned the same identifier and their data are associated with the same record.</p> <p>CODE 3 Similar but different record</p> <p>This code is used for records that have similar identifying information but belong to different entities.</p>

Implementation in Data Set Specifications:

[Identification in healthcare clusterHealth](#), Standard 05/10/2016

Conditional obligation:

Conditional on the data element: [Identifier—investigation flag, yes/no code N](#) being recorded as code 1 'Yes'.

DSS specific information:

For code 2: An intertwined record can also be known as a 'same site active clinical record' and is a result of clinical records that are merged in error.
