Person—partner refugee indicator

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	648291
Registration status:	Commonwealth Department of Social Services (retired) , Standard 20/06/2018
Definition:	An indicator of whether a person's partner has been identified as a refugee at some time.

Object Class attributes

Identifying and definitional attributes

Object class:	Person
Definition:	A human being.

Collection and usage attributes

Comments:	Prior to 13 March 2018, the definition of the 'Person' Object class was 'A human being, whether man, woman or child'. From 13 March 2018, the definition was edited by removing the words '...whether man, woman or child' so that a person is defined as 'A human being'. This amendment was undertaken to align the definition of a person with the <i>Australian Government Guidelines on the Recognition of Sex and Gender</i> and the Australian Bureau of Statistics (ABS) <i>Standard for Sex and Gender Variables</i> , which recognise that there are sex and gender types that are not exclusively male or female.

Property attributes

Identifying and definitional attributes

Property:	Partner refugee indicator
Definition:	An indicator that an individual's partner has at some time been a person who owing to a well-founded fear of being persecuted for reasons of race, religion, nationality, membership of a particular social group or political opinion, is outside the country of his/her nationality and is unable, or owing to such fear, is unwilling to avail himself/herself of the protection of that country.
