Carer household authorisation file cluster

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	655225
Registration status:	Children and Families , Superseded 22/11/2016
DSS type:	Data Element Cluster
Scope:	<p>The Carer household authorisation file cluster contains information about all carer households who were authorised to provide funded home-based out-of-home-care placements at any point during the reference period. Authorisation means the carer household has received the required approval to have a child placed with them. This includes carer households authorised to provide:</p> <ul style="list-style-type: none">• Foster care (including provisionally approved carers)• Relative/kinship care (including provisionally approved carers)• Respite• Long-term guardianship.

Collection and usage attributes

Guide for use:	Residential care and family group homes are not included in the scope of carers in the Carer household authorisation file.
Collection methods:	Each change in Carer household authorisation/registration status will be a new line in the file, delineated by an authorisation start and end date. Renewal of an existing authorisation as part of a standard ongoing review process or a change from provisional to full authorisation are not deemed to be a change in authorisation status and should not be recorded on a new line. The original authorisation start date should be retained.
Implementation start date:	01/07/2012
Implementation end date:	30/06/2014
Comments:	Data are extracted as at 31 August. The 2013–14 reporting period is the main collection period. Data for 2012–13 are also collected to allow specific calculations to be undertaken.
