Rates are directly age-standardised to the 2001 Australian population.

Variability bands are to be calculated for single-year rates using the method below.

Presented per 100,000 population.

Computation:

Number

100,000 x (Numerator ÷ Denominator)

Variability bands are to be calculated for single-year rates using the following method for estimating 95% confidence intervals:

Age-standardised rate

$$CI (ASR)_{95\%} = ASR \pm 1.96 \times \sqrt{\sum_{i=1}^i \frac{w_i^2 d_i}{n_i^2}}$$

Where w_i = the proportion of the standard population in age group i

d_i = the number of deaths in age group i

n_i = the number of people in the population in age group i

Numerator:

Number of deaths of persons aged less than 75 categorised as potentially avoidable

Disaggregation:

2013, 2014, 2015 (resupplied for revision to ABS cause of death data), 2016—State and territory.

2013, 2014, 2015 (updated for revision to ABS cause of death data), 2016—Nationally, by Indigenous status (not reported).

2009–2013, 2010–2014, 2011–2015 (updated for revision to ABS cause of death data), 2012–2016—State and territory, by Indigenous status.

Some disaggregations may result in numbers too small for publication. Disaggregation by Indigenous status will be based on data only from jurisdictions for which the quality of Indigenous identification is considered acceptable—New South Wales, Queensland, South Australia, Western Australia, Northern Territory.

Comments:

Most recent data available for 2018 National Healthcare Agreement performance reporting:

- 2016 (Total population and Indigenous status at national level)
- Aggregated data 2012–2016 (Indigenous status)

A number of updates to the ICD-10 were applied to 2013 and subsequent years causes of death data. Details of the impact of these changes on the mortality data are described in [ABS Implementation of Iris Software: Understanding Coding and Process Improvements](#).

2013 data are coded using ICD-10 (2013 version). 2014, 2015 and 2016 data are coded using ICD-10 (2015 version).

Due to small number of Indigenous deaths reported each year, 5-year combined data will be reported for state and territory disaggregations.

Estimated Residential Population (ERP) for total population is sourced from ERP rebased after the 2011 Census. ERP for Indigenous data is sourced from 2011 based ERP.

Data by remoteness may be available, pending assessment of data quality.
