# Record run date

## Identifying and definitional attributes

<b>Metadata item type:</b>	Property
<b>METEOR identifier:</b>	658882
<b>Registration status:</b>	<a href="#">Commonwealth Department of Health, Recorded 21/10/2016</a>
<b>Definition:</b>	<p>The date on which the data record is extracted from a computer system.</p> <p>The record run date essentially represents the date on which a data extraction program or facility is executed.</p>

## Collection and usage attributes

<b>Guide for use:</b>	<p>The record run date should not be confused with other similar concepts such as the record extraction date, which represents something akin to a processing date or a data finalisation date, i.e. the date on which a data record reaches a particular status associated with its level of completeness or correctness.</p> <p>For example, a data extraction program run on 20 October 2016 might explicitly specify the inclusion of all data records processed on 15 October 2016. In this case, the record run date would be 20 October 2016, while the record extraction date would be 15 October 2016.</p>
