Definition:	A designated region with a pre-determined population used for describing location.
Context:	Based on the Australian Statistical Geography Standard (ASGS) structure of six hierarchical statistical area levels comprised in ascending order: Mesh Block, Statistical Area Level 1, Statistical Area Level 2, Statistical Area Level 3, Statistical Area Level 4, and State and Territory. Each level directly aggregates to the level above.

Object Class attributes

Identifying and definitional attributes

Object class:	[Address]()
