Indigenous primary health care: Pl03a-Number of regular clients for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715) was claimed, 2015-2017

Identifying and definitional attributes

Metadata item type: Indicator

Indicator type: Output measure

Short name: Pl03a-Number of regular clients for whom an MBS Health Assessment for

Aboriginal and Torres Strait Islander People (MBS Item 715) was claimed, 2015-

2017

METEOR identifier: 663909

Registration status: Health, Superseded 25/01/2018

Indigenous, Superseded 27/02/2018

Description: Number of regular clients who are Indigenous, aged 0-4 years and for whom a

Medicare Benefits Schedule (MBS) Health Assessment for Aboriginal and Torres Strait Islander People was claimed within the previous 12 months AND number of regular clients who are Indigenous, aged 25 years and over and for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People was claimed

within the previous 24 months.

Rationale: The role of primary health care providers in early detection has been reinforced in

recent years through the introduction of additional items under the MBS to encourage regular health assessments for all Aboriginal and Torres Strait Islander people. Regular health assessments encourage early detection, diagnosis and intervention for common and treatable conditions that cause morbidity and early

mortality.

Indigenous primary health care key performance indicators (2015-2017)

Collection and usage attributes

Population group age

from:

0-4 years

25 years and over

Computation description:

Count of regular clients who are Indigenous, aged 0-4 years and for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People was claimed within the previous 12 months AND count of regular clients who are Indigenous, aged 25 years and over and for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People was claimed within the previous 24 months.

'Regular client' refers to a client of an Australian Government Department of Healthfunded primary health care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the Department of Health-funded primary health care service at least 3 times in 2 years.

MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715): A health assessment specifically available to all people of Aboriginal and Torres Strait Islander descent which can be used for health assessments across the age spectrum. The health assessment includes the assessment of a patient's physical health, and psychological and social well-being. It also assesses whether preventive health care and education should be offered to the patient, to improve that patient's health and well-being (DoH 2013).

Presented as a number.

Computation:

Calculated separately for regular clients aged 0-4 years and 25 years and older. Numerator only

Numerator:

Calculation A: Number of regular clients who are Indigenous, aged 0-4 years and for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715) was claimed within the previous 12 months.

Calculation B: Number of regular clients who are Indigenous, aged 25 years and over and for whom an MBS Health Assessment for Aboriginal and Torres Strait Islander People (MBS Item 715) was claimed within the previous 24 months.
