Indigenous primary health care: PI14a-Number of regular clients aged 50 years and over who are immunised against influenza, 2015-2017

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Output measure
Short name:	PI14a-Number of regular clients aged 50 years and over who are immunised against influenza, 2015-2017
METEOR identifier:	663954
Registration status:	Health, Superseded 25/01/2018 Indigenous, Superseded 27/02/2018
Description:	Number of regular clients who are Indigenous, aged 50 years and over and who are immunised against influenza.
Rationale:	Influenza remains a major cause of illness and death among Indigenous adults. Vaccination has been demonstrated to reduce deaths.
Indicator set:	Indigenous primary health care key performance indicators (2015-2017) Health, Superseded 25/01/2018 Indigenous, Superseded 27/02/2018

Collection and usage attributes

Population group age from:	50 years
Computation description:	Count of regular clients who are Indigenous, aged 50 years and over and who are immunised against influenza. 'Regular client' refers to a client of an Australian Government Department of Health-funded primary health care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the Department of Health-funded primary health care service at least 3 times in 2 years. For Indigenous people aged 50 years and over, the *Australian Immunisation Handbook* (DoH 2013) recommends immunisation against influenza. An Indigenous person aged 50 years and over is immunised against influenza if they have received an influenza vaccine within the previous year. Presented as a number.
Computation:	Numerator only
Numerator:	Number of regular clients who are Indigenous, aged 50 years and over and who are immunised against influenza.
