Comments:

No new data are available for this indicator.

The most recent data available was for the 2017 National Indigenous Reform Agreement (NIRA) Report (2015–16 reporting cycle) are for 2014-15.

The most recent survey data for this indicator are:

- Indigenous: NATSISS 2014–15.
- Non-Indigenous: SEW 2014.

The baseline NIRA Report presented data from the 2008 NATSISS (Indigenous) and 2008 SEW (non-Indigenous) as the main data collection.

The 2014 NIRA Report presented data from the NATSIHS component of the 2012–13 Australian Aboriginal and Torres Strait Islander Health Survey (AATSIHS) and the 2012 SEW.

Prior to 2010, the SEW did not include people living in very remote areas. From 2010 onwards, the SEW includes people living in very remote areas except discrete Indigenous communities.

Prior to 2010, the SEW did not include the remoteness variable. Therefore, a non-Indigenous comparator for remoteness for the 2008 NATSISS is not reported.

The size of the standard errors mean that SEW data may not be adequate for measuring change over time.

Baseline year for the Council of Australian Governments' NIRA target (Halve the gap in employment outcomes between Indigenous and non-Indigenous Australians within a decade) is 2008; baseline year for this indicator is 2008; target year is 2018.

The term 'Aboriginal and Torres Strait Islander people' is preferred when referring to the separate Indigenous peoples of Australia. However, the term 'Indigenous' is used interchangeably with 'Aboriginal and Torres Strait Islander' in this indicator set to assist readability.
