

Tier 2 Non-Admitted Services classification (version 5.0)

Identifying and definitional attributes

Metadata item type:	Classification Scheme
Synonymous names:	Tier 2 v5.0
METEOR identifier:	672642
Registration status:	<ul style="list-style-type: none">• Health, Superseded 18/07/2020• Independent Hospital Pricing Authority, Standard 17/07/2018
Definition:	A classification for non-admitted patient service events based on the type and specialty of the health-care professional providing the service and the nature of the non-admitted service.
Context:	<p>A list of outpatient clinics was developed in 1997–98 as an outcome of the Developmental Ambulatory Classification Study conducted by the National Hospital Cost Data Collection (NHCDC).</p> <p>During 2011, the list was updated to accommodate the increase in services that were previously provided to inpatients being undertaken as outpatient services. This also included a full review of the classification in response to the National Health Reform Agreement 2011, which provided for the introduction of a national activity based funding (ABF) system. The aim was to develop a classification system for use with non-admitted services for ABF purposes. The classification has been reviewed annually from 2012–14 to ensure the classification's relevance and ability to meet the needs of the users.</p>
Classification structure:	<p>Tier 2 classes provide a consistent framework for counting non-admitted service events. They are based on an assessment of both the type and specialty of the health-care professional providing the service and the nature of the service provided. This has resulted in a number of classes that is sufficient to ensure clinical meaningfulness and exclusivity across the spectrum of non-admitted services.</p> <p>The classes are also grouped into a number of categories that reflects the type of service provided and the health-care professionals that typically provide the service. The classes are grouped into four categories, as follows:</p> <ul style="list-style-type: none">• procedures• medical consultation• stand-alone diagnostic• allied health/clinical nurse specialist intervention.
