Representational attributes

| | | |
|----------------------------------|--------------|---|
| Representation class: | Code | |
| Data type: | Number | |
| Format: | N | |
| Maximum character length: | 1 | |
| Permissible values: | Value | Meaning |
| | 1 | Independent or supervision only |
| | 2 | Limited assistance |
| | 3 | Limited physical assistance or Extensive assistance/total dependence/tube fed |
| | 4 | Other than two persons physical assist |
| | 5 | Two or more persons physical assist |

Collection and usage attributes

Guide for use:

The Resource Utilisation Groups –Activities of Daily Living (RUG-ADL) is an assessment tool that assesses a person's motor function for activities of daily living for the following four items:

| <i>Item number</i> | <i>Activity of daily living</i> |
|--------------------|---------------------------------|
| 1 | Bed mobility |
| 2 | Toileting |
| 3 | Transfers |
| 4 | Eating |

Values 1, 3, 4 and 5 are valid for items 1, 2 and 3.

Values 1, 2 and 3 are valid for item 4.

CODE 2 Limited assistance

Refers to the act of assistance without manual handling. It is used for the activity Eating and is not eligible for other activities.

CODE 3 Limited physical assistance or Extensive assistance/total dependence/tube fed

For activities Bed mobility, Toileting, and Transfer value 3 refers to the act of assistance requiring manual handling (hence the inclusion of 'physical' in the title). For the activity Eating, value 3 refers to more significant assistance with feeding either through physical assistance or the use of medical assistance.

Scores are summed for the four ADL items: bed mobility, toileting, transfer and eating. A total RUG-ADL scores ranges from a minimum 4 and maximum 18.
