Health of the Nation Outcome Scale 65+ score code N

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	676201
Registration status:	Health , Superseded 18/12/2019
Definition:	A code set representing the severity of psychiatric symptoms of an individual aged 65 and over.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	0	No problems within the period stated
	1	Minor problem requiring no action
	2	Mild problem but definitely present
	3	Moderately severe problem
	4	Severe to very severe problem
Supplementary values:	8	Unknown

Collection and usage attributes

Guide for use:

CODE 8 Unknown

This code should be used for Health of the Nation Outcome Scale for elderly people (HoNOS 65+) values that are missing or recorded in the HoNOS 65+ tool as '9 - Unknown'.

The HoNOS 65+ is used to rate adult mental health service users. Together, the scales rate various aspects of mental and social health.

HoNOS 65+ is answered on an item-specific anchored 5-point scale with higher scores indicating more problems. Each scale is assigned a value of between 0 and 4, or 8 for unknown. The twelve scales are as follows:

- behavioural disturbance
- non-accidental self injury
- problem drinking or drug use
- cognitive problems
- problems related to physical illness or disability
- problems associated with hallucinations and delusions
- problems associated with depressive symptoms
- other mental and behavioural problems
- problems with social or supportive relationships
- problems with activities of daily living
- overall problems with living conditions
- problems with work and leisure activities and the quality of the daytime environment.

The sum of the individual scores of each of the scales (excluding code 8 'Unknown') represents the total HoNOS 65+ score. The total HoNOS 65+ score ranges from 0 to 48, and represents the overall severity of an individual's psychiatric symptoms.
