| Maximum character length: | 1 | |
| | Value | Meaning |
| Permissible values: | 0 | No problems within the period stated |
| | 1 | Minor problem requiring no action |
| | 2 | Mild problem but definitely present |
| | 3 | Moderately severe problem |
| | 4 | Severe to very severe problem |
| Supplementary values: | 8 | Unknown |

Collection and usage attributes

Guide for use:

CODE 8 Unknown

This code should be used for Health of the Nation Outcome Scale for elderly people (HoNOS 65+) values that are missing or recorded in the HoNOS 65+ tool as '9 - Unknown'.

The HoNOS 65+ is used to rate adult mental health service users. Together, the scales rate various aspects of mental and social health.

HoNOS 65+ is answered on an item-specific anchored 5-point scale with higher scores indicating more problems. Each scale is assigned a value of between 0 and 4, or 8 for unknown. The twelve scales are as follows:

- behavioural disturbance
- non-accidental self injury
- problem drinking or drug use
- cognitive problems
- problems related to physical illness or disability
- problems associated with hallucinations and delusions
- problems associated with depressive symptoms
- other mental and behavioural problems
- problems with social or supportive relationships
- problems with activities of daily living
- overall problems with living conditions
- problems with work and leisure activities and the quality of the daytime environment.

The sum of the individual scores of each of the scales (excluding code 8 'Unknown') represents the total HoNOS 65+ score. The total HoNOS 65+ score ranges from 0 to 48, and represents the overall severity of an individual's psychiatric symptoms.
