Juvenile Justice DSS 2016–18

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	676794
Registration status:	Youth Justice, Superseded 23/08/2022
DSS type:	Data Set Specification (DSS)
Scope:	<p>The Juvenile Justice DSS (JJ DSS) 2016–18 contains information about young people under youth justice supervision in Australia. Young people under youth justice supervision are defined as those who are under the supervision or case management of a youth justice agency because they have:</p> <ul style="list-style-type: none">• committed or allegedly committed an offence between the ages of 10–17 years <p>OR</p> <ul style="list-style-type: none">• committed or allegedly committed an offence when aged over 17 years and who are treated as young people due to their vulnerability or immaturity. <p>It does not contain information on young people who are supervised or case managed by organisations other than a youth justice agency (for example, young people supervised by an adult correctional agency).</p> <p>The JJ DSS 2016–18 contains the Juvenile Justice National Minimum Data Set (JJ NMDS) 2016–18, two additional data element clusters, and one additional data element.</p> <p>The JJ NMDS 2016–18 contains four data element clusters all of which contain unit record level data:</p> <ul style="list-style-type: none">• Juvenile Justice Client file cluster• Juvenile Justice Order file cluster• Juvenile Justice Detention file cluster• Juvenile Justice Order types file cluster. <p>The two additional, optional data element clusters are:</p> <p>The Juvenile Justice Charge cluster, which contains the Australian and New Zealand Standard Offence Classification (ANZSOC) code of all charges relating to unsentenced supervised orders (e.g. supervised bail, remand).</p> <p>The Juvenile Justice Offence file cluster, which contains the Australian and New Zealand Standard Offence Classification (ANZSOC) code of all offences relating to sentenced supervised orders (e.g. sentenced detention, probation).</p> <p>The additional data element is:</p> <p>Person—country of birth, code (SACC 2016) NNNN is an optional item which can be collected as part of the client file.</p>

Collection and usage attributes

Statistical unit:	Person
Implementation start date:	01/07/2016
Implementation end date:	30/06/2018
Comments:	In November 2012 the Australasian Juvenile Justice Administrators (AJJA) agreed to retain their name (and the name of the collection), but to change the preferred terminology within the collection from 'juvenile justice' to 'youth justice'.

Metadata items in this Data Set Specification

Seq No.	Metadata item	Obligation	Max occurs
1	Juvenile Justice NMDS 2016–18	Mandatory	1
1	Juvenile Justice Client file cluster	Mandatory	1
1	Person—person identifier, XXXXXX[X(14)]	Mandatory	1
DSS specific information:			
The person identifier is a jurisdictionally-specific code that uniquely identifies a young person (youth justice client) within the State or Territory youth justice department responsible for the young person.			
A State or Territory identifier should be the first character of the person identifier according to the following:			
1	New South Wales		
2	Victoria		
3	Queensland		
4	South Australia		
5	Western Australia		
6	Tasmania		
7	Northern Territory		
8	Australian Capital Territory		
9	Other territories (e.g. Christmas Island)		
2	Person—letters of family name, text XXX	Mandatory	1
DSS specific information:			
'Letters of name' is collected as one item in cell number 2 and is a specific combination of the 2nd, 3rd and 5th letters of the person's family name and the 2nd and 3rd letters of the person's given name.			
3	Person—letters of given name, text XX	Mandatory	1
DSS specific information:			
'Letters of name' is collected as one item in cell number 2 and is a specific combination of the 2nd, 3rd and 5th letters of the person's family name and the 2nd and 3rd letters of the person's <u>given name</u> .			

Seq No.	Metadata item	Obligation	Max occurs
4	Person—date of birth, DDMMYYYY DSS specific information: The young person should be aged 10–25 years at the order start date. The young person should be aged 10–25 years at the detention start date.	Mandatory	1
5	Person—sex, code N	Mandatory	1
6	Person—Indigenous status, code N	Mandatory	1
7	Service event—first service contact date, DDMMYYYY DSS specific information: This data element is used in the youth justice client file cluster as the date on which the person was first supervised or case managed by the youth justice department (date of first supervised order). Guide for Use The date can be before the start of the NMDS (i.e. 1/7/00). ‘Contacts’ are those that would count as a supervised order (i.e. would be within scope for the JJ NMDS). Do not include court appearances or other types of contacts. If the first service contact date is unknown, leave the field blank. Business rules The first service contact must be on or before the end of the reporting period. The first service contact date must be before or equal to the earliest order start date in the JJ NMDS. The young person's age at the first service contact date (calculated using DOB) should be at least 10 years.	Mandatory	1
2	Juvenile Justice Order file cluster	Mandatory	99

Seq No.	Metadata item	Obligation	Max occurs
1	<p>Person—person identifier, XXXXXX[X(14)]</p> <p>DSS specific information:</p> <p>The person identifier is a jurisdictionally-specific code that uniquely identifies a young person (youth justice client) within the State or Territory youth justice department responsible for the young person.</p> <p>A State or Territory identifier should be the first character of the person identifier according to the following:</p> <ul style="list-style-type: none"> 1 New South Wales 2 Victoria 3 Queensland 4 South Australia 5 Western Australia 6 Tasmania 7 Northern Territory 8 Australian Capital Territory 9 Other territories (e.g. Christmas Island) 	Mandatory	1

Seq No.	Metadata item	Obligation	Max occurs
2	Order—order identifier. X[X(49)]	Mandatory	99

DSS specific information:

For the purposes of the JJ NMDS, this unique identifier is retained across collection periods. The identifier is assigned by the State or Territory youth justice department.

In the order file, the order identifier will in most cases be unique. However, where a single order specifies multiple types of supervision, for example a blended order that specifies a period in detention followed by a period of community-based supervision, the information relating to each type of supervision will comprise a separate record but the order identifier will remain the same.

In the example below, order #10001 is a blended order that comprises a period in detention from 1/1/08 to 1/6/08 followed by a period in the community from 1/6/08 to 1/12/08. Order #10002 is an unrelated remand order.

Person identifier	Order identifier	Order start date	Order end date	Order type-national	Order end reason	Comment
1	10001	01/01/08	01/06/08	35 (sentenced detention)	completed	blended order part 1
1	10001	01/06/08	01/12/08	32 (sentenced community-based with additional mandated requirements)	completed	blended order part 2
1	10002	15/01/09	20/01/09	21 (remand)	completed	unrelated order

Queensland: Don't count detention orders that are followed by a period of supervised release as blended orders.

Business rules

- If the [order identifier](#) matches the order identifier of another record and the [person identifiers](#) are the same, the order end date of the first record should equal the order start date of the second record.
- The order identifier ([charge file](#)) must be in the order file.
- If the [order type](#) ([order file](#)) is an unsentenced order then there must be a record in the charge file with a matching order identifier.
- The order identifier ([offence file](#)) must be in the order file.

Seq No.	Metadata item	Obligation	Max occurs
3	Order—order start date, DDMMYYYY	Mandatory	99

DSS specific information:

Guide for use

This date may not necessarily be the date that supervision began; for example, if a sentence of detention is backdated to the start of the young person's remand period, the order start date will be before the period of sentenced detention actually began.

Orders may be concurrent and overlap; that is, the order start date may be before the order end date of the previous order.

The order start date is the date the order first comes into effect, which may not necessarily be the same as the date the court handed down the order. Orders that are handed down by a court to take effect in the future should not be backdated to the date they were handed down.

Business rules

- The [order start date](#) must be on or before the order end date.
- The young person must be aged at least 10 years (based on date of birth) at the order start date.
- The young person should be aged 10-25 years at the order start date.
- The [order start date](#) must be on or before the end of the reporting period.
- If the order end reason for a previous order was 3 (death) there must not be any subsequent orders.
- If the [order identifier](#) matches the order identifier of another record and the [person identifiers](#) are the same, the [order end date](#) of the first record should equal the order start date of the second record.

Seq No.	Metadata item	Obligation	Max occurs
4	<p>Order—order end date, DDMMYYYY</p> <p><i>DSS specific information:</i></p> <p>Guide for use</p> <p>The order end date is the date the order ceases to be in effect, as specified on the order.</p> <p>If a young person ceases to be under the supervision relating to the order, but the order is still in effect, the order does not end. For example, if a young person is given a sentenced detention order with an end date of 1 December but is released on supervised release or parole on 1 November, the order end date remains 1 December unless the court varies the end date of the order.</p> <p>If the court varies the end date of the order, the new (varied) end date is the order end date.</p> <p>If an order is revoked or cancelled, the order end date is the date that the order was revoked or cancelled. This includes orders that are revoked or cancelled due to re-offending or failure to comply with conditions and orders that are cancelled, quashed or varied on appeal.</p> <p>If an order extends over two or more reporting periods and the order end date changes because the order was revoked, cancelled, quashed or varied, the order end date and the order end reason will differ between data submissions. The changed order end date should be supplied in the reporting period in which the order was revoked, cancelled, quashed or varied; however, a related record supplied in a previous data submission should not be updated. For example, a record relating to order ID 101 was supplied for the reporting period 2009–10 with an end date of 1/6/11 (that is, the order end date was after the end of the reporting period). A record relating to the same order was supplied in the following reporting period, 2010–11, but the order had been varied and now has an end date of 1/7/09. It is sufficient to report this new end date in the 2010–11 reporting period; a 'fix' is not required for the records relating to this order supplied in previous data submissions.</p> <p>When an order end date is after the end of the reporting period (e.g. for the 2009–10 reporting period, after the 30/06/2010) or if the order end date is null in the local data system, supply the order end date or insert the dummy date (22/02/2222) if the order end date is unknown. Do not end the order at the end of the reporting period.</p> <p>Business rules</p> <ul style="list-style-type: none"> • The order end date must be on or after the start of the reporting period. • The order start date must be on or before the order end date. • If the order end date is on or before the end of the reporting period, the order end reason must be a reason other than 0 (not applicable). • If the order identifier matches the order identifier of another record and the person identifiers are the same, the order end date of the first record should equal the order start date of the second record. 	Mandatory	99

5 [Order—offence identifier. X\[X\(49\)\]](#)

Conditional 99

Conditional obligation:

Conditional on a charge resulting in a conviction. If charges cannot be linked with offences, do not supply data for this item.

DSS specific information:

The offence identifier (charge file) allows for a charge to be linked with the resulting offence. If charges cannot be linked with offences, do not supply data for this item.

For example, following their first court appearance, a young person is placed on remand for a particular offence (order ID 333). At their second court appearance, they are released on supervised bail (order ID 334). At the third court appearance, the young person is sentenced to a supervised order in relation to the charge. The resulting order is order ID 6 in the order file.

The first record shows that the person was charged with an offence and that the related order is order ID333. The offence ID field is blank because for this order, the charge did not result in a conviction. The second record shows that the charge ID is the same as the first record and so the charge is the same. It requires a new record because the order ID is different. At the end of this order, the charge resulted in a conviction, so the offence ID field contains ID of the corresponding offence record.

Person ID	Charge ID	Charge type	Order ID	Offence ID
1	1	1200	333	
1	1	1200	334	6

If the offence identifier matches the offence identifier of another record for the same person identifier, the offence types must be the same.

Null values

Leave the field blank if:

- The offence identifier is unknown
- The offence identifier is not applicable.

6 [Address—suburb/town/locality name, text X\[X\(45\)\]](#)

Mandatory 99

DSS specific information:

This item is collected for the suburb/town/locality name of the court in which the young person appeared when placed on the order relating to the charge. For police-referred detention, where the young person did not appear in court when being placed on the order, the court location should be reported as 'Not applicable'.

Suburb/Town/Locality should be sourced from the Australia Post Standard postcode file for the relevant year, available on the [Australia Post website](#).

7 [Order—court type, code N\[N\]](#)

Mandatory 99

4 [Juvenile Justice Offence file cluster](#)

Optional 99

Conditional obligation:

This is an optional file

Seq No.	Metadata item	Obligation	Max occurs
---------	---------------	------------	------------

1 [Person—person identifier, XXXXXX\[X\(14\)\]](#)

Mandatory 1

DSS specific information:

The person identifier is a jurisdictionally-specific code that uniquely identifies a young person (youth justice client) within the State or Territory youth justice department responsible for the young person.

A State or Territory identifier should be the first character of the person identifier according to the following:

- 1 = New South Wales
- 2 = Victoria
- 3 = Queensland
- 4 = South Australia
- 5 = Western Australia
- 6 = Tasmania
- 7 = Northern Territory
- 8 = Australian Capital Territory
- 9 = Other territories (e.g. Christmas Island)

2 [Order—offence identifier, X\[X\(49\)\]](#)

Mandatory 99

DSS specific information:

The offence identifier allows for a single offence to be mapped to multiple orders.

For example, a young person is serving a sentence in detention for offence type 1350. They are released on parole/supervised release in relation to this offence.

The first record shows the young person was supervised under order ID 12 (the sentenced detention) in relation to offence type 1350. In the second record, the offence is the same as in the first record because a) the offence types are the same and b) the offence ID is the same. A second record is required because the order ID is different (the parole order).

Person ID	Offence ID	Offence type	Order ID
6	1	1350	12
6	1	1350	13

If the offence identifier matches the offence identifier of another record for the same person identifier, the offence types must be the same.

No null values.
