Aboriginal and Torres Strait Islander standalone substance use service sobering-up/residential respite/short-term care client numbers cluster

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	677106
Registration status:	Indigenous , Standard 07/12/2017
DSS type:	Data Element Cluster
Scope:	Aboriginal and Torres Strait Islander standalone drug and alcohol services offer temporary, live-in accommodation for clients requiring substance use treatment and rehabilitation.

The Aboriginal and Torres Strait Islander standalone substance use service sobering-up/residential respite/short-term care client numbers cluster describes the number of clients that stayed in sobering-up/residential respite/short-term care during the reporting period.

Sobering-up clients stay in residential care overnight to sober up and do not receive formal rehabilitation. Residential respite/short-term clients spend 1 to 7 days in residential care for respite, and do not receive formal rehabilitation.

The four data elements are used together to provide a count of clients by their Indigenous status, sex and age ranges.

Collection and usage attributes

Guide for use:

Each person is only counted once, no matter how many times that they were admitted into residential care during the year.

Includes:

- clients in residential care overnight to sober-up, without formal rehabilitation. This includes Mobile Assistance Patrol/night patrol clients and 'walk-ins' who stay overnight to sober-up.
- clients that stayed in short-term residential care for 1 to 7 days for respite purposes and do not receive formal rehabilitation.

Excludes:

- residential treatment/rehabilitation programs
- family members unless they were also a client of the service and have their own file/record.

Collection methods:

The Aboriginal and Torres Strait Islander standalone substance use service is required to provide numbers of male, female and total clients in sobering-up/residential respite/short-term care by Indigenous status and age group (0–18, 19–35 and 36 years and over), as detailed in the Scope, Clients in sobering-up/residential respite/short-term care table. The total Indigenous and non-Indigenous clients may include unknown or not reported sex. Total sex may include unknown or not reported Indigenous status.
