Value domain attributes

Representational attributes

Representation class:	Total	
Data type:	Number	
Format:	N[NNN]	
Maximum character length:	4	
	Value	Meaning
Supplementary values:	9999	Not stated/inadequately described

Data element attributes

Collection and usage attributes

Guide for use:	<p>The articles must be directly linked with a research project that has been through a formal approval process that includes an ethics committee or equivalent governance approval.</p> <p>The peer review process will be specific to the agency responsible for the ultimate publication, and the article must go through a new peer review process for each publication.</p> <p>Where there are multiple authors across multiple sites, the article should be attributed to the establishment of the chief or primary author.</p> <p>The chief or primary author is the project leader who takes the lead role in the conduct of the research project, and takes responsibility for the completion and lodgement of any required applications.</p> <p>Articles should be counted within the financial year in which they were published, irrespective of when the research project was undertaken.</p>
