Establishment—number of approved research projects, total N[NNN]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Total number of approved research projects
METEOR identifier:	678920
Registration status:	Health , Standard 17/10/2018 Independent Hospital Pricing Authority , Standard 27/11/2017
Definition:	The total number of approved research projects being undertaken at an establishment.
Context:	Health sector research
Data Element Concept:	Establishment—number of approved research projects
Value Domain:	Total number N[NNN]

Value domain attributes

Representational attributes

Representation class:	Total	
Data type:	Number	
Format:	N[NNN]	
Maximum character length:	4	
	Value	Meaning
Supplementary values:	9999	Not stated/inadequately described

Data element attributes

Collection and usage attributes

Guide for use:	Research projects need to have been through the formal ethics and/or governance process and been successful in receiving approval. Formal ethics or governance approval must meet the standards of the National Health and Medical Research Council. For a research project which extends across financial years, the research project should be counted within the financial year in which the project was approved by the research governance or ethics body. For a research project that involves multiple establishments, the research project should be counted once at the major or primary establishment. For a research project that has multiple researchers, the research project should be counted once at the establishment of the chief or primary author. The chief or primary author is the project leader who takes the lead role in the conduct of the research project, and takes responsibility for the completion and lodgement of any required applications.
