Definition: A code set representing 'yes', 'no' and 'not stated/inadequately described'.

Representational attributes

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

Permissible values:

Value	Meaning
1	Yes
2	No

Supplementary values:

Value	Meaning
9	Not stated/inadequately described

Collection and usage attributes

Guide for use: CODE 9 Not stated/inadequately described

This code is not for use in primary data collections.

Data element attributes

Collection and usage attributes

Guide for use:

CODE 1 Yes

This code is used to indicate that direct care has been provided by multiple health-care providers.

CODE 2 No

This code is used to indicate that direct care has not been provided by multiple health-care providers.

CODE 9 Not stated/inadequately described

This code is used when there is insufficient information to determine whether direct care has been provided by multiple health-care providers.

Collection methods:

The definition of the term 'multiple health-care provider' can vary depending on the context and/or collection in which the term is being applied.

For example, in the context of reporting non-admitted activity data for activity based funding, 'multiple health-care provider' means three or more health-care providers who deliver care either individually or jointly within a non-admitted patient service event. The health-care providers may be of the same profession (medical, nursing or allied health). However, they must each have a different speciality so that the care provided by each provider is unique and meets the definition of a non-admitted patient service event.

In practice, this should be interpreted as meaning that the patient can separately identify the unique care provided by each health-care provider. For example:

- A patient attends a pain management clinic for assessment. At the assessment there is a doctor specialising in chronic diseases, a doctor specialising in pain management, a nurse specialising in pain management and an occupational therapist. As each provider will provide unique clinical content to the assessment, this is counted as multiple health-care providers.
- A patient attends a rehabilitation clinic and sees a physiotherapist, an occupational therapist and then a nurse, all individually. This would be counted as multiple health-care providers.
- A patient attends a hydrotherapy clinic, sees a physiotherapist who provides a plan, and then completes the plan with a physiotherapist aid. This would not be counted as multiple health-care providers.
