# Birth event—additional indication for caesarean section

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element Concept
<b>METEOR identifier:</b>	680209
<b>Registration status:</b>	<a href="#">Health</a> , Superseded 12/12/2018
<b>Definition:</b>	An additional indication for a caesarean section being performed during a birth event.

## Object Class attributes

### Identifying and definitional attributes

<b>Object class:</b>	<a href="#">Birth event</a>
<b>Definition:</b>	The sequence of actions by which a baby and the afterbirth (placenta) are expelled or extracted from the uterus at childbirth. The process usually starts spontaneously about 280 days after conception with onset of labour, but it may be started by artificial means.
<b>Specialisation of:</b>	<a href="#">Life event</a>

### Source and reference attributes
